HandyQuip offers online marketplace for rentals

by: [HME News Staff](#) - Friday, September 6, 2019

PONTE VEDRA, Fla. – HandyQuip is a new online marketplace designed to make it easy for people to rent medical equipment like wheelchairs, scooters, walkers and bath safety products, according to the Ponte Vedra Recorder. Stephane Poussou worked with a software engineer to design algorithms that match people with the equipment they need at a good price, but don't overwhelm them. Visitors to www.handyquip.com choose what type of equipment they need, select rental dates from a calendar and type in their location. "Quinn" helps visitors through the process. Right now, delivery is available throughout northeast Florida, from Jacksonville to Ponte Vedra and Nocatee.
